

Integrated Mill Systems

Integrated Safety

Integrated Mill Systems provides automation and process expertise in a variety of applications. BUT did you know we also provide Turnkey Safety Solutions? IMS provides safety services ranging from machine risk/safety assessments, safety functional specification design & engineering, hardware and programming implementation, as well as installation engineering and validation. IMS has the capability of Turnkey Safety Systems thanks to our comprehensive expertise in these critical areas:

- Risk Assessments • Safety Functional Specification •
 - Safety Hardware Engineering & Supply •
- Safety PLCs & IO • Fencing & Guarding • Safety Devices • Key Switches •
 - Light Curtains • Scanners • Hydraulic and Pneumatic Engineering •
- Safety Programming • Installation Engineering & Installation Services •

IMS is a "Supplier Neutral" company that will install best in class hardware utilizing commercially available products for both new and retrofit projects.

Safety Assessments & Integrated Automation Safety Solutions

Our Safety PLC systems bring the benefits of traditional PLCs to complex safety applications, replacing the hard-wired relay systems normally required to bring automated processes to a safe state. Safety PLCs allow standard and safety-related programs to reside in a single controller chassis, providing flexibility and familiarity in an easy-to-use environment. Our Safety Solutions provide open architecture designs that are commissioned by the Integrated Mill Systems engineers who created them.

IMS – Your Turnkey Safety Solution Provider!
