

Integrated Mill Systems

Turnkey Installation Solutions

Integrated Mill Systems provides complete Turnkey Services for a variety of Automation and Control applications. From project inception to final commissioning, our Project Management and Installation Team manages all phases of the project staying in line with critical milestones.

The result is a Turnkey Project with exceptional safety performance, outstanding quality workmanship, and a full range of engineering services.

The IMS team provides comprehensive expertise in:

- Risk & Safety Assessments • Control System Design •
- HMI/PLC/L2 Programming • Implementation Strategies •
- Installation Engineering (Electrical, Mechanical, Civil, & Hydraulic) •
